thermochimica acta

# Subject index

Active oxygen
Thermal conversion of hydrocarbons on solid matrices 113
Adhesive
Investigation of thermal degradation of some adhesives used in the automobile industry by thermal analysis/mass spectrometry and GC-MS 73

Basic oxygen furnace slag
Thermal behaviour of basic oxygen furnace waste slag 87
Burning
Thermal degradation of different fire retardant polyurethane foams 59

Carbonation
Thermal behaviour of basic oxygen furnace waste slag 87
CdTe
Thermal investigations of active compounds in thin-layer photovoltaic modules (CdTe and $CuInSe_2$) 23
Characterization
Chemical, petrographic and thermoanalytical characterization of two Northbohemian low rank coals 141
Charring
Reactions of hydrocarbons during thermodesorption from sediments 123
Chlorinated polymer
Recycling of vinylidene chloride copolymer coated polypropylene film: a study of the thermal degradation of VDC copolymer 51
Coal
Chemical, petrographic and thermoanalytical characterization of two Northbohemian low rank coals 141
Contaminated soil
Thermoanalytical methods for characterizing hydrocarbon–sludge–soil mixtures 101

$CuInSe_2$
Thermal investigations of active compounds in thin-layer photovoltaic modules (CdTe and $CuInSe_2$) 23

Dehydrochlorination
Recycling of vinylidene chloride copolymer coated polypropylene film: a study of the thermal degradation of VDC copolymer 51
Dielectric technique
Evaluation of relative humidity effects on fabric-supported paintings by dynamic mechanical and dielectric analysis 7
DSC
Prediction of the thermal response of hazardous materials during storage using an improved technique 29
DTA
The influence of combustion bed temperature during waste incineration on slag quality 95
Chemical, petrographic and thermoanalytical characterization of two Northbohemian low rank coals 141

Environment
Study of recyclable polymer automobile undercoatings containing PVC using TG/FTIR 1
Epoxy resin
Investigation of thermal degradation of some adhesives used in the automobile industry by thermal analysis/mass spectrometry and GC-MS 73

Fixation of pollutants
Thermoanalytical methods for characterizing hydrocarbon–sludge–soil mixtures 101
Flame retardant
Thermal degradation of different fire retardant polyurethane foams 59
Fossil fuel

Chemical, petrographic and thermoanalytical characterization of two Northbohemian low rank coals 141

HCl emission
Study of recyclable polymer automobile undercoatings containing PVC using TG/FTIR 1
Hydration
Thermal behaviour of basic oxygen furnace waste slag 87
Hydrocarbon
Thermal conversion of hydrocarbons on solid matrices 113
Hydrocarbon sludge
Thermoanalytical methods for characterizing hydrocarbon–sludge–soil mixtures 101

Incineration
The influence of combustion bed temperature during waste incineration on slag quality 95

Kinetic analysis
Recycling of vinylidene chloride copolymer coated polypropylene film: a study of the thermal degradation of VDC copolymer 51

Microcalorimetry
Prediction of the thermal response of hazardous materials during storage using an improved technique 29

Multiple step decomposition kinetics
Prediction of the thermal response of hazardous materials during storage using an improved technique 29

Organic pollutant
Reactions of hydrocarbons during thermodesorption from sediments 123

Painting
Evaluation of relative humidity effects on fabric-supported paintings by dynamic mechanical and dielectric analysis 7
Polymer
Thermal degradation of different fire retardant polyurethane foams 59
PVC
Study of recyclable polymer automobile undercoatings containing PVC using TG/FTIR 1
Pyrolysis
Investigation of thermal degradation of some adhesives used in the automobile industry by thermal analysis/mass spectrometry and GC-MS 73
Recycling
Study of recyclable polymer automobile undercoatings containing PVC using TG/FTIR 1

Redox behaviour
Thermal conversion of hydrocarbons on solid matrices 113
Relative humidity
Evaluation of relative humidity effects on fabric-supported paintings by dynamic mechanical and dielectric analysis 7

Sediment
Reactions of hydrocarbons during thermodesorption from sediments 123
Semiconductor
Thermal investigations of active compounds in thin-layer photovoltaic modules (CdTe and Cu-$InSe_2$) 23
Simulation
Prediction of the thermal response of hazardous materials during storage using an improved technique 29
Slag
The influence of combustion bed temperature during waste incineration on slag quality 95
Solid structure
Thermal conversion of hydrocarbons on solid matrices 113
Stabilization
Thermal behaviour of basic oxygen furnace waste slag 87

TA
Thermal investigations of active compounds in thin-layer photovoltaic modules (CdTe and Cu-$InSe_2$) 23
Investigation of thermal degradation of some adhesives used in the automobile industry by thermal analysis/mass spectrometry and GC-MS 73
TG
Thermal investigations of active compounds in thin-layer photovoltaic modules (CdTe and Cu-$InSe_2$) 23
Recycling of vinylidene chloride copolymer coated polypropylene film: a study of the thermal degradation of VDC copolymer 51
TG/FTIR
Study of recyclable polymer automobile undercoatings containing PVC using TG/FTIR 1

Thermal analysis/mass spectrometry
Thermal degradation of different fire retardant polyurethane foams 59
The influence of combustion bed temperature during waste incineration on slag quality 95
Chemical, petrographic and thermoanalytical characterization of two Northbohemian low rank coals 141
Thermal degradation
Thermal degradation of different fire retardant polyurethane foams 59
Investigation of thermal degradation of some adhesives used in the automobile industry by thermal analysis/mass spectrometry and GC-MS 73
Thermal reaction
Reactions of hydrocarbons during thermodesorption from sediments 123
Thermal treatment
Thermal conversion of hydrocarbons on solid matrices 113
Thermoanalytical technique
Thermoanalytical methods for characterizing hydrocarbon–sludge–soil mixtures 101
Thermodesorption
Reactions of hydrocarbons during thermodesorption from sediments 123
Thermomechanical
Evaluation of relative humidity effects on fabric-supported paintings by dynamic mechanical and dielectric analysis 7

Viscoelastic parameter
Evaluation of relative humidity effects on fabric-supported paintings by dynamic mechanical and dielectric analysis 7
